## NEW DATABASES

The Library now has access to two new business databases offered through Infoglobe Report on Business Corporate Database (ROB) offers detailed corporate data on more than 1700 Canadian corporations. It includes all public companies traded on the Canadian stock exchanges as well as selected private companies and crown corporations. The ROB database provides detailed up-to-date financial information retrieved through multiple access points such as company name, size of a company, industry sector and company location.

Insight is made up of six databases which provide a host of invaluable data on Canadian public and private corporations. Some of the information that can be obtained through one or more of Insight databases include company registration name; date of incorporation; interrelationship of Canadian corporation - discover who holds what companies and where they are held; bankruptcies; trademark information; financial data; as well as identifying corporations operating in a specific geographic area.

For further information on these or other databases which are accessed by the Library please contact:

- a complete Statistics Canada collection.
- many sources for national and international statistics covering employment, wages, industrial accidents, manpower trends, etc.

Why not give us a try? Many of you use the library already. But we would like to meet those of you who have not dropped in or given us a call. Your questions are important too, and we have the resources that can help to answer them.

The reference librarians--Dolly, Sandra and Brian--would be happy to say "hello" and give you a tour of the library. You will quickly find how easy it is to use the library and to locate information.

Can't come to us? Then we can come to you! We visit regularly the District Offices of the Ministry and can show you a videotape highlighting our resources and services. We can explain what's available and how to get access to it even though you are many miles away.

So, let's get together. The library is here to help you with your information needs. Call us at (416) 965-1641 or 1-800-387-5404.

### TECHNICAL SERVICES

OLIVIA HAMILTON  
IAN KELLOGG  
HELEN LONG  
THOMAS TU

SENIOR SERIALS TECHNICIAN  
HEAD OF UTLAS TECHNICAL OPERATIONS  
ACQUISITIONS TECHNICIAN  
JUNIOR SERIALS TECHNICIAN

These four people are part of the Technical Services team that works mainly behind the scenes to order, catalogue and process all materials acquired by the library.

**Olivia Hamilton** came to the Ministry 7 years ago from Scotland where she trained and worked as a library technician in public and college libraries. She orders and catalogues all serial publications and standing orders and serves regularly on the Reference Desk.

As Head of Utlas Technical Operations for the past 6 years, **Ian Kellogg** maintains the library's catalogue on the Utlas system. He also assists users at the Reference Desk. Ian is currently completing his Masters degree in Library Science at the University of Toronto.

**Helen Long** orders all non-serial publications for the library, and for branches and satellite collections in the Ministry. She came to the library from the Ministry of Health when the Occupational Health and Safety Collection was transferred to the Ministry of Labour 10 years ago. Kathleen Wilson, from Public Services, is currently filling this position while Helen is on a temporary leave.

**Thomas Tu** has worked in the Library for over 7 years. He is responsible for receiving and distributing all mail, and for recording, processing, claiming and routing the almost 3000 periodical and other serial publications received by the Library.

## SPOTLIGHT: ONLINE DATABASES

Quick access to worldwide sources of information is what online database searching is all about. The hundreds of databases available through the Ministry Library leave few subjects untouched. As an employee of the Ministry, you can tap into this information resource by simply contacting the Library and asking for one of the reference librarians: Sandra Gold, for questions relating to labour relations, employment, and human rights; or Brian Morrison, for questions relating to occupational health and safety.

For the health and safety professional, there are a growing number of databases providing information on safety engineering, ergonomics, occupational health and diseases, epidemiology, occupational hygiene, chemical toxicology, mine safety and radiation protection. In addition to these, you also have access to general science and engineering databases, newspaper databases for the latest press coverage and legal databases for legislation and case law.

What kind of information will I receive? Basically, two types or formats exist. First is bibliographic information -- a list of books, reports and periodical articles on the subject searched arranged by author and title and often giving an abstract. Or, secondly, numeric information -- toxicity values, exposure limits, analytical data. In addition, there are a number of databases providing M.S.D.S. (material safety data sheet) information which combines both bibliographic and numeric data.

How is this information presented? You will receive a "printout" on the subject you have requested. This may take the form of an M.S.D.S. if you had asked for a chemical profile. Or, you will receive a list of relevant books or articles from which you may choose to see certain items.

How do I get copies of the actual documents listed on the printout? Just call the Library and we will endeavour to forward the material to you in the shortest time possible. Often the items you need are right here in our collections. If not, we will tell how long it will take to retrieve your requests.

But I need information on this topic regularly? No problem! The Library can provide you with a regular update of new information on any subject you request -- weekly, monthly or quarterly. Just ask us about our current awareness S.D.I. program. (No, not "Star Wars" -- Selective Dissemination of Information.) It's all very easy. Our telephone number is: (416) 965-1641.

PLEASE NOTE: Online search services are limited to employees of the Ministry of Labour.
